

Comprehensive Primary Care

CPC ...by the numbers

In the first two years of the Comprehensive Primary Care (CPC) initiative, practices have transformed how they deliver primary care, guided by the nine CPC milestones. These figures are a snapshot of practices' progress in their work to achieve better care, smarter spending, and healthier people.

482 practices in **7** regions

38 public & private payers

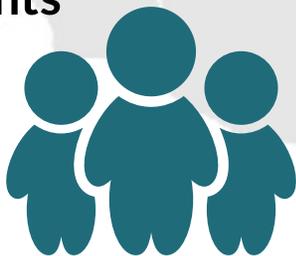

1 in **5** practices is located in a rural area

1 in **3** practices has two or fewer practitioners

2.7 million active patients including:

335,000+ Medicare FFS beneficiaries

66,000+ Medicaid FFS beneficiaries

1 in **7** patients receives care management

88% of patients are risk-stratified

2600+ practitioners

5 staff members involved in care management at the average practice

100% of practices offer 24/7 access to a practitioner who can access their EHR in real-time

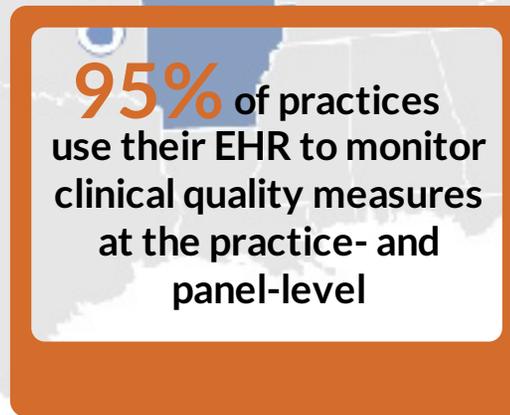

93% of practices asynchronously communicate with patients through an online portal

205 patient and family advisory councils

86%

median rate of follow-up to patients who are discharged from the hospital or emergency department

95% of practices use their EHR to monitor clinical quality measures at the practice- and panel-level
