The code used to identify the type of claim record being processed in NCH.

NOTE1: During the Version H conversion this field was populated with data throughout history (back to service year 1991).

NOTE2: During the Version I conversion this field was expanded to include inpatient 'full' encounter claims (for service dates after 6/30/97). Placeholders for Physician and Outpatient encounters (available in NMUD) have also been added.

NOTE: 10/95-7/98 this series was
assigned to HHA's but rescinded - no
HHA's were ever assigned a number
from this series.

Exception:

P001-P999   Organ procurement organization

(1) These facilities (SPRDFS) will be assigned
the same provider number whenever they
are recertified.

(2) The 6400-6499 series of provider numbers
in Iowa (16), South Dakota (43) and Texas (45)
have been used in reducing acute care costs (RACC)
experiments.

(3) In Virginia (49), the series 7100-7299 has
been reserved for statewide subunit components
of the Virginia state home health agencies.

(4) Parent agency must have a number in the
7000-7299, 7400-7799 or 8000-8499 series.

NOTE:
There is a special numbering system for units
of hospitals that are excluded from prospective
payment system (PPS) and hospitals with SNF
swing-bed designation. An alpha character in
the third position of the provider number
identifies the type of unit or swing-bed
designation as follows:

S = Psychiatric unit (excluded from PPS)
T = Rehabilitation unit (excluded from PPS)
U = Short term/acute care swing-bed hospital
V = Alcohol drug unit (prior to 10/87 only)
W = Long term SNF swing-bed hospital
     (eff 3/91)
Y = Rehab hospital swing-bed (eff 9/92)
Z = Rural primary care swing-bed hospital

There is also a special numbering system for
assigning emergency hospital identification numbers (non participating hospitals). The sixth position of the provider number is as follows:

E = Non-federal emergency hospital
F = Federal emergency hospital

Claim Payment Amount         NUM    12

Amount of payment made from the Medicare trust fund for the services covered by the claim record. Generally, the amount is calculated by the FI or carrier; and represents what was paid to the institutional provider, physician, or supplier, with the exceptions noted below. **NOTE: In some situations, a negative claim payment amount may be present; e.g., (1) when a beneficiary is charged the full deductible during a short stay and the deductible exceeded the amount Medicare pays; or (2) when a beneficiary is charged a coinsurance amount during a long stay and the coinsurance amount exceeds the amount Medicare pays (most prevalent situation involves psych hospitals who are paid a
daily per diem rate no matter what the charges are.

Under IP PPS, inpatient hospital services are paid based on a predetermined rate per discharge, using the DRG patient classification system and the PRICER program. On the IP PPS claim, the payment amount includes the DRG outlier approved payment amount, disproportionate share (since 5/1/86), indirect medical education (since 10/1/88), total PPS capital (since 10/1/91). It does NOT include the pass thru amounts (i.e., capital-related costs, direct medical education costs, kidney acquisition costs, bad debts); or any beneficiary-paid amounts (i.e., deductibles and coinsurance); or any other payer reimbursement.

Under SNF PPS, SNFs will classify beneficiaries using the patient classification system known as RUGS III. For the SNF PPS claim, the SNF PRICER will calculate/return the rate for each revenue center line item with revenue center code = '0022'; multiply the rate times the units count; and then sum the amount payable for all lines with revenue center code '0022' to determine the total claim payment amount.

Under Outpatient PPS, the national ambulatory payment classification (APC) rate that is calculated for each APC group is the basis for determining the total payment. The Medicare payment amount takes into account the wage index adjustment and the beneficiary deductible and coinsurance amounts. NOTE: There is no CWF edit check to validate that the revenue center Medicare payment amount equals the claim level Medicare payment amount.

Under Home Health PPS, beneficiaries will be classified into an appropriate case mix category known as the Home Health Resource Group. A HIPPS code is then generated corresponding to the case mix category (HHRG).

For the RAP, the PRICER will determine the payment amount appropriate to the HIPPS code by computing 60% (for first episode) or 50% (for subsequent episodes) of the case mix episode payment. The payment is then wage index adjusted.

For the final claim, PRICER calculates 100% of the amount due, because the final claim is processed as an adjustment to the RAP, reversing the RAP payment in full. Although final claim will show 100% payment amount, the provider will actually receive the 40% or 50% payment.

Exceptions: For claims involving demos and BBA encounter data, the amount reported in this field may not just represent the actual provider payment.

For demo Ids '01','02','03','04' -- claims contain amount paid to the provider, except that special 'differentials' paid outside the normal payment system

Beneficiary LRD Used Count

The number of lifetime reserve days that the beneficiary has elected to use during the period covered by the institutional claim. Under Medicare, each beneficiary has a one-time reserve of sixty additional days of inpatient hospital coverage that can be used after 90 days of inpatient care have been provided in a single benefit period. This count is used to subtract from the total number of lifetime reserve days that a beneficiary
has available.

Revenue Center Code          | CHAR | 4

The provider-assigned revenue code for each cost center for which a separate charge is billed (type of accommodation or ancillary). A cost center is a division or unit within a hospital (e.g., radiology, emergency room, pathology). EXCEPTION: Revenue center code 0001 represents the total of all revenue centers included on the claim.

| Line HCPCS Code           | CHAR | 5

The Health Care Financing Administration (HCFA) Common Procedure Coding System (HCPCS) is a collection of codes that represent procedures, supplies, products and services which may be provided to Medicare beneficiaries and to individuals enrolled in private health insurance programs. The codes are divided into three levels, or groups, as described below:

SHORT NAME: HCPCS_CD
LONG NAME: HCPCS_CD

COMMENT:
Prior to Version H this line item field was named: HCPCS_CD. With Version H, a prefix was added to denote the location of this field on each claim type (institutional: REV_CNTR and
noninstitutional: LINE).

Level I
Codes and descriptors copyrighted by the American Medical Association's Current Procedural Terminology, Fourth Edition (CPT-4). These are 5 position numeric codes representing physician and nonphysician services.

**** Note: ****
CPT-4 codes including both long and short descriptions shall be used in accordance with the HCFA/AMA agreement. Any other use violates the AMA copyright.

Level II
Includes codes and descriptors copyrighted by the American Dental Association's Current Dental Terminology, Second Edition (CDT-2). These are 5 position alpha-numeric codes comprising the D series. All other level II codes and descriptors are approved and maintained jointly by the alpha-numeric editorial panel (consisting of HCFA, the Health Insurance Association of America, and the Blue Cross and Blue Shield Association). These are 5 position alpha-numeric codes representing primarily items and nonphysician services that are not represented in the level I codes.

Level III
Codes and descriptors developed by Medicare carriers for use at the local (carrier) level. These are 5 position alpha-numeric codes in the W, X, Y or Z series representing physician and nonphysician services that are not represented in the level I or level II codes.

<td>Revenue Center Unit Count</td>
<td>NUM</td>
<td>8</td>
</tr>
</tbody>
</table>

A quantitative measure (unit) of the number of times the service or procedure being reported was performed according to the revenue center/HCPCS code definition as described on an institutional claim.

Depending on type of service, units are measured by number of covered days in a particular accommodation, pints of blood, emergency room visits, clinic visits, dialysis treatments (sessions or days), outpatient therapy visits, and outpatient clinical diagnostic laboratory tests.
NOTE1: When revenue center code = '0022' (SNF PPS) the unit count will reflect the number of covered days for each HIPPS code and, if applicable, the number of visits for each rehab therapy code.

<td>12</td>
</tr>
</tbody>
</table>

Charges relating to unit cost associated with the revenue center code. Exception (encounter data only): If plan (e.g. MCO) does not know the actual rate for the accommodations, $1 will be reported in the field.

NOTE1: For SNF PPS claims (when revenue center code equals '0022'), HCFA has developed a SNF PRICER to compute the rate based on the provider supplied coding for the MDS RUGS III group and assessment type (HIPPS code, stored in revenue center HCPCS code field).

NOTE2: For OP PPS claims, HCFA has developed a PRICER to compute the rate based on the Ambulatory Payment Classification (APC), discount factor, units of service and the wage index.

NOTE3: Under HH PPS (when revenue center code equals '0023'), HCFA has developed a HHA PRICER to compute the rate. On the RAP, the rate is determined using the case mix weight associated with the HIPPS code, adjusting it for the wage index for the beneficiary's site of service, then multiplying the result by 60% or 50%, depending on whether or not the RAP is for a first episode.

On the final claim, the HIPPS code could change the payment if the therapy threshold is not met, or partial episode payment (PEP) adjustment or a significant change in condition (SCIC) adjustment. In cases of SCICs, there will be more than one '0023' revenue center line, each representing the payment made at each case-mix level.

<tr>
<td>Revenue Center Total Charge Amount</td>
<td>NUM</td>
<td>12</td>
</tr>
</tbody>
</table>

The total charges (covered and non-covered) for all accommodations and services (related to the revenue code) for a billing period before reduction for the deductible and coinsurance amounts and before an adjustment for the cost of services provided. NOTE: For accommodation revenue center total charges must equal the rate times units (days).

EXCEPTIONS:
(1) For SNF RUGS demo claims only (9000 series revenue center codes), this field contains SNF customary accommodation charge, (ie., charges related to the accommodation revenue center code that would have been applicable if the provider had not been participating in the demo).

(2) For SNF PPS (non demo claims), when revenue center code = '0022', the total charges will be zero.

(3) For Home Health PPS (RAPs), when revenue center code = '0023', the total charges will equal the dollar amount for the '0023' line.

(4) For Home Health PPS (final claim), when revenue center code = '0023', the total charges will be the sum of the revenue center code lines (other than '0023').

(5) For encounter data, if the plan (e.g. MCO) does not know the actual charges for the accommodations the total charges will be $1 (rate) times units (days).

CODES:
Revenue Center Deductible Coinsurance Code
---------------------------------------------
0 = Charges are subject to deductible and coinsurance
1 = Charges are not subject to deductible
2 = Charges are not subject to coinsurance
3 = Charges are not subject to deductible or coinsurance
4 = No charge or units associated with this revenue center code. (For multiple HCPCS per single revenue center code)

For revenue center code 0001, the following MSP override values may be present:

M = Override code; EGHP services involved (eff 12/90 for non-institutional claims; 10/93 for institutional claims)
N = Override code; non-EGHP services involved  
  (eff 12/90 for non-institutional claims;  
  10/93 for institutional claims)
X = Override code: MSP cost avoided

Effective with Outpatient PPS (OPPS), the Ambulatory Payment Classification (APC) code used to identify groupings of outpatient services. APC codes are used to calculate payment for services under OPPS.

Effective with Home Health PPS (HHPPS), this field will only be populated with a HIPPS code if the HIPPS code that is stored in the HCPCS field has been downcoded and the new code will be placed in this field.

NOTE1: Under SNF PPS and HHPPS, HIPPS codes are stored in the HCPCS field. **EXCEPTION**: if a HHPPS HIPPS code is downcoded the downcoded HIPPS will be stored in this field.

NOTE2: Beginning with NCH weekly process date 8/18/00, this field will be populated with data. Claims processed prior to 8/18/00 will contain spaces in this field.
