Compendium of Person & Family Engagement (PFE) Tools & Resources

AUDIENCE
Clinicians (and the PTNs supporting them) participating in TCPI seeking to transform care through increased person and family engagement.

GOAL
Provide in one location an organized collection of PFE resources, highlighting select resources deemed to be most practical and user-friendly for TCPI purposes.

OBJECTIVES
- Organize resources according to six PFE Components
  - Patient Voice
  - Shared Decision Making
  - Patient Activation
  - e-Tools
  - Health Literacy
  - Medication Management
- Indicate whether resource is applicable to MIPS, the TCPI Change Package, and whether the resource is CME/CEU-eligible
- Highlight “Editor’s Choice” picks for quick and easy selections by users

WORKGROUP MEMBERS
- Kelly Parent, Institute for Patient- and Family-Centered Care
- Marie Abraham, Institute for Patient- and Family-Centered Care
- Lisa Morrise, Patient Advocate
- Becky Haines, American College of Radiology
- Susan Brown, Telligen, TCPI National Faculty
- Mary Reeves, MD, Family Medicine, TCPI National Faculty

EXAMPLES OF KEY RESOURCE ORGANIZATIONS
AANP, ACP, ACR, AHRQ, AMA, HIMSS, IPFCC, PCPCC, Planetree

## Component Seven: General Resources

- **Websites**: 8
- **Toolkits**: 8
- **Guides**: 8
- **Articles**: 9
COMPONENT ONE: SUPPORT OF PATIENT VOICES IN GOVERNANCE AND OPERATIONAL DECISION-MAKING

Support of Patient Voices: Are there policies, procedures and actions taken to support patient and family participants in governance or operational decision-making committees of the practice (Person and Family Advisory Councils, Board Representatives, etc.)?

Websites
1. Patient and Family Engagement in Primary Care, Agency for Healthcare Research and Quality (AHRQ)
2. PCPCC SAN/IPFCC Patient and Family Curriculum
3. PAC Collaborative Resources from the San Francisco Health Network
4. Patient and Family Engagement: Learnings from the Partnership for Patients

Toolkits
5. Numerous patient engagement toolkits produced by the University of Wisconsin
6. Patient Centered Medical Home Initiative

Guides
7. Advancing the Practice of Patient-and-Family-Centered Care in Primary Care and Other Ambulatory Settings

23. Patient and Family Center Care – Why Radiology
COMPONENT TWO: SHARED DECISION-MAKING

Shared Decision-Making: Does the practice support shared decision-making by training and ensuring that clinical teams integrate patient-identified goals, preferences, outcomes, and concerns into the treatment plan (e.g., those based on the individual’s culture, language, religion, social determinants, etc.)?

16. Understanding Motivational Interviewing
17. NRHI Reducing Unnecessary Utilization Video Module 1, Lisa Letourneau, MD (2016)
   This is a 60-minute video presented by the NRHI SAN that addresses reducing unnecessary utilization by creating clinician and consumer engagement to implement Choosing Wisely in practice. The video focuses on ways practices can implement Choose Wisely efforts and to understand how these efforts translate into practice workflows. This video is also aligned with change concepts 1.1.3 (Collaborate with patients and families) and 3.4.2 (Eliminate waste)
18. Motivational Interviewing -- OARS Skills

Articles

**COMPONENT FOUR: E-TOOLS**

**E-Tools:** Does the practice use an e-tool (patient portal or other E-Connectivity technology) that is accessible to both patients and clinicians and that shares information such as test results, medication management list, vitals and other information and patient record data?

**Websites**

1. *What is a patient portal?* HealthIT.gov; 2015
   - Overview of patient portal and benefits of use. Contains links to provider stories touting benefits to patient outcomes, provider workflow, improved communication and patient engagement.

2. *Health Information Technology Model*, Rural Health Information Hub (RHIhub); 2016
   - Includes bullet point overview of HIT model. Lists links to webpages, webinars, and toolkits for additional information ie: HITECH Act, EHR, meaningful use, CMS, AHRQ, etc.

**Toolkits**

   - Requires registration and fees of $175 per member or $45 for students.

5. *Patient Portal Toolkit*, The American Health Information Management Association (AHIMA); 2016
   - Requires registration and fees of $175 per member or $45 for students.

6. *HealthIT.gov Patient Engagement Playbook*

7. *Health IT Tools and Resources*, AHRQ; 2016

**Articles**

8. *Web Applications for Patient Communications*

9. *Implications of Direct Patient Online Access to Radiology Reports Through Patient Web Portals*

    - Topics include: branding, user experience & functionality; information display; use appropriate language; anticipate obstacles to adoption; and optimal outcomes for patient portals.
11. **Meaningful Use Case Studies: Patient portal benefits patient care and provider workflow**, HealthIT.gov
   - Includes info on patient portal implementation, getting patients registered, sample talking points for providers, benefits, challenges, & lessons learned in patient portal implementation.

12. **An Asynchronous Online Collaboration Between Radiologists and Patients: Harnessing the Power of Informatics to Design the Ideal Patient Portal**

13. **Social Media and the Patient Experience**

14. **Using Health Information Technology to Engage Patients in Their Care**, Gephart, S. & Effken, J. Online Journal of Nursing Informatics, 17(3); 2013
   - Discusses HIT patient engagement strategies in relation to patient portals, personal health records (PHR), mobile health strategies, and telehealth.

17. **FAQ 570: Does the HIPAA Privacy Rule permit health care providers to use e-mail to discuss health issues and treatment with their patients?** U.S. Department of Health and Human Services (HHS.gov); 2008

18. **FAQ: Can you use texting to communicate health information, even if it is to another provider or professional?** HealthIT.gov; 2013

19. **Using Health IT to Engage Patients in their Care: The role of providers in implementing online access, Partnership for Women and Families; 2012
   - Experiences of physician pioneers in use of patient portals documented. Demonstrates benefits of patient portals to providers and patients.

20. **AHRQ Patient Access to Medical Notes**

### Component Five: Health Literacy

**Health Literacy**: Is a health literacy patient survey being used by the practice (e.g., CAHPS Health Literacy Item Set)?

#### Websites

1. **AHRQ Web Page on Health Literacy and Cultural Competency**
2. **Translated Information for Patients about Preparing for Tests and Examination Procedures**
3. **Health Literacy Podcasts**
   - Teach-Back (HLOL #129), After Visit Summaries (HLOL #152), Helping Teens Transition from Pediatrics to Adult-Centered Care (HLOL #132), Health Literacy Screening Tools (HLOL #124) and Choosing Wisely: A Campaign Helping Patients be Engaged Consumers (HLOL #104)
4. **National Action Plan to Improve Health Literacy**
5. **National Institutes of Health, Health Literacy**
6. **The Office of Disease Prevention and Health Promotion**
7. **AHRQ Health Literacy**
Toolkits

8. Better Communication, Better Care: Provider Tools to Care for Diverse Populations

9. AHRQ Health Literacy Universal Precautions Toolkit; 2015
   This toolkit, written by AHRQ, identifies universal precautions to ensure all patients and caregivers have no difficulty comprehending their health information. The aim of the set precautions are to; Simplify communication and minimize miscommunication, make the office environment and health care system easier to navigate, and to support patients efforts to improve their health.

Articles

Component Six: Medication Management

Medication Management: Does the clinical team work with the patient and family to support their patient/caregiver management of medications?

Websites

1. Determine Complexity of Medication Regime
   Automated tool to determine complexity of medication regime

Guides

2. AHRQ Rx Medicine Instructions Guide

3. AMA Medication Adherence Module

4. Patient Centered Primary Care Institute (PCPCI)
   A patient booklet describing strategies for using medications successfully to alleviate symptoms of depression. This booklet focuses on antidepressant treatment but many of the principles and strategies also apply to using other medications successfully.
Explicit and Standardized Prescription Medicine Instructions; AHRQ; 2014
Explicit, standardized instructions improve patients' understanding, and possibly reduce errors while improving adherence. These tested instructions for pills follow the Universal Medication Schedule (UMS), which simplifies complex medicine regimens by using standard time periods for administration (morning, noon, evening, and bedtime). These instructions have also been translated into Chinese, Korean, Russian, Spanish, and Vietnamese.

Medication Management in Care Transitions
